**All Features Available
with Wondershare UniConverter 15.5**

Key Features

Converter

Harness the power of advanced GPU acceleration for rapid and flawless conversion of 4K, 8K, and HDR videos. With support for over 1,000 video/audio formats, experience unparalleled speed and quality in your conversions.

Downloader

Supporting downloads from 1000+ popular websites, UniConverter allows for easy access to a wide range of resources including music, videos, and video thumbnails.

Compressor

UniConverter provides high-quality batch compression for videos and audio, ideal for email, mobile devices and social media. Accurate size estimations and support for DVD files ensure seamless operations.

Editor

Trim, crop, apply effects and filters, speed up videos, adjust audio and denoise, set audio tracks, add or remove watermarks with customization, and add subtitles with various font and color selections.

Player

Enjoy seamless playback of over 1000 formats, including 4K/8K/FHD videos and DVDs. Speed up or slow down videos, switch subtitles and audio tracks effortlessly, and capture favorite moments with a single click.

Merger

Combine TV series or playlists, trim unwanted parts, and merge clips precisely. Swift performance with multi-core processor and GPU acceleration, supporting popular formats like MP4, MOV, AVI, and MP3.

Screen Recorder

Capture full screen, custom screens, webcams, and more with ease. Enjoy flexible recording options, including picture-in-picture mode and system audio integration. Apply pre-set mosaics and logos for professional recordings.

DVD Burner

UniConverter's DVD tools simplify burning tasks: convert videos to DVD, copy DVDs to blank discs, and burn music to CD while preserving original quality. Customize your creations with a variety of DVD templates for a personalized touch.

Speech To Text

Accurately transcribe audio and video files, from interviews to lectures, saving you valuable time. Get your words down quickly and accurately for all your transcription needs.

Creative Toolbox

GIF Maker

Select your photos or video clips and transform them into animated GIF images. Customize frame rate, start and end times, and output size for personalized creations.

Intro & Outro

Efficiently manage video beginnings and endings with UniConverter's Intro & Outro feature. Batch delete or add intros and outros with ease, saving time and effort across multiple videos.

Fix Media Metadata

Ensure multilingual support and accurate details like video name, type, language, and release date for efficient organization. Fix and edit the metadata of all your media files.

Image Converter

Efficiently convert images to various formats, including JPG, PNG, BMP, TIFF, WEBP, SVG, PSD, EPS, ICO, XBM, and XPM. Use batch conversion and customize size and quality for seamless processing.

CD Converter

Insert your CD to begin the conversion process. Acquire lossless MP3 files with speed.

CD Burner

Easily burn your music to CD with batch-burning capabilities using UniConverter.

VR Converter

Convert videos to VR format and enjoy immersive experiences on VR devices.

Transfer

Connect your device with a USB cable. Effortlessly transfer video and audio files to any device or hard drive.

AI Lab

For Video

AI Video Enhancer
Upscale videos to 8K, convert frame rates and denoise with UniConverter's AI. Benefit from dual AI models for denoising and frame interpolation. 100% AI-powered denoising and up to 240 FPS boost in a click.

Auto Highlight
Extract highlights from movies and TV shows, seamlessly splicing them together. The resulting collection with flexible lengths attracts user interest and satisfies rapid multi-platform distribution needs.

Scene Detection
Split movies into clips by detecting shot transitions and streamlining editing tasks without the need for frame-by-frame adjustments. Enable quick editing of short clips within larger videos.

AI Script Generator
Ideal for filmmakers, YouTubers, and social media enthusiasts. Generate compelling narratives for commercials, promotional videos, and engaging campaigns, ensuring resonance with audiences.

AI Subtitle Translator
Translate auto-detected video scripts seamlessly into over 120 languages, scripts and subtitle character count.

Watermark Editor
Remove unwanted objects from videos, including text, logos, people, images, and objects. Easily add watermarks with text, images, or dynamic elements.

Smart Trimmer
Remove scenes with verbal errors, low sound, or noisy backgrounds effortlessly. Trim silent or low-voicing content and specific video portraits in few clicks.

AI Portrait
Automatically detect and remove the background without a chroma key or green screen. Replace backgrounds with ease using images and stunning templates.

Auto Crop
Automatically resize and crop your videos for popular social media platforms like YouTube, TikTok, Facebook, and Instagram without any watermarks.

Remove Watermark 2.0
Automatically recognize or manually select watermark areas. Easily perform batch selections with preview options for streamlined editing.

Video Stabilization
Utilizing AI analysis, adjust crop scale and apply edge processing to fill hole pixels, reducing jitter and ensuring smooth footage.

AI Subtitle Editor
Create, add, and generate subtitles effortlessly. Add subtitles to videos and movies permanently, and automatically generate subtitles from videos.

For Image

AI Image Enhancer
Utilizing diverse methods to fulfill your image processing needs, including upgrading low-resolution images to 8K,

face enhancement, old photo repair, colorization, and color correction.

AI Thumbnail Maker

Input theme information, select styles, and generate cover images effortlessly. Explore diverse styles for creative versatility across platforms.

Background Remover

Remove backgrounds from images in bulk. Instantly achieve HD-quality PNG transparency for logos, product images, and portraits without compromising quality.

For Audio

Text to Speech

Enter your text, select the tone, and bring your words to life with the audio match. Perfect for marketing, knowledge training, game scenarios, or converting novels into audiobooks.

Vocal Remover

Separate vocals from any song into music and vocal tracks. Enjoy separate preview and export options for enhanced control

and flexibility. No limit on audio file size.

Noise Remover

Remove background noise from video and audio, including wind, rain, traffic, static, or white fan noise. Eliminate echo from audio call recordings, static noise from mic recordings, and humming and hissing.

Voice Changer

Transform voices into male, female, child, robot, or transformer voices. Batch apply changes for efficiency while protecting privacy and adding fun to your projects.
